

PERFORMANCE TESTING PHASE

Team ID	NM2025TMID0177948
Project Name	Medical Inventory Management System
Team Members	Reshma J T Rg.no:(921222104301 Bagavathi Aruleswari Rg.no:(921222104001)

Folder Reference:

Document/Performance Testing/

Includes:

- Performance Testing.pdf
- Readme.md

1. Objective

Ensure the Medical Inventory Management System performs efficiently under various load conditions, maintaining high response rates and data integrity.

2. Testing Strategy

- **Load Testing:** Simulate 1000+ concurrent users accessing stock data.
 - **Stress Testing:** Evaluate system behavior during massive data input.
 - **Scalability Testing:** Assess horizontal scaling on cloud deployment.
 - **Security Testing:** Check role-based access and data encryption.
-

3. Metrics & Benchmarks

Parameter	Target	Result
Average Response Time < 2 seconds		✓ Achieved
Data Accuracy	100%	✓ Achieved
CPU Utilization	< 70%	✓ Achieved
Uptime	99.9%	✓ Achieved

4. Tools Used

- Apache JMeter
 - Postman (API validation)
 - Selenium (UI performance)
 - MongoDB Compass (query efficiency)
-

5. Result Summary

The system maintained high stability during simulated hospital peak hours, showing no data loss and consistent response rates.
